

PAVER PLATES

Mikasa

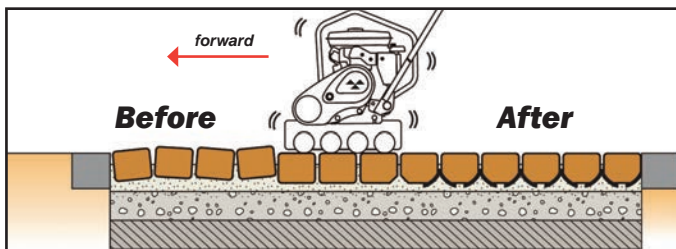

Make a lasting impression.

MQ Mikasa paver plates are preferred by landscapers & hardscapers for large installation projects. Their unique design protects expensive pavers used on high-end custom work and enhances finish quality.

- **Hard rubber rollers protect pavers from scratching, chipping, breaking and dragging.**
- **Great for narrow areas and compaction alongside walls.**
- **Toolless foldable handle allows for quick and easy loading into vans and trucks.**
- **Rollers allow for easy pull back to compact on the spot.**
- **Greatly improves productivity compared to standard plate compactors.**

PROCESS AND RESULTS

Give interlocking pavers an even finish

You can fold the handle without any tools and load on trucks or vans.

SPECIFICATIONS

MVB85H

Plate size WxL in (mm) - 12.60 x 17.05 (320 x 433)
 Centrifugal Force lbs. (kN) - 2,270 (10.1)
 Exciter Speed VPM (Hz) - 5,600 (93)
 Operating Weight lbs. (kg) - 203 (92)
 Rubber Roller Diameter in (mm) - 2.9 (73)
 Gasoline Engine - Honda GX120
 HP Rating BHP (kW)* - 3.5 (2.6)
 Rollers - 4

MVB150H

Plate size WxL in (mm) - 21.89 x 29.62 (556 x 752)
 Centrifugal Force lbs. (kN) - 3,417 (15.2)
 Exciter Speed VPM (Hz) - 5,800 (97)
 Operating Weight lbs. (kg) - 348 (158)
 Rubber Roller Diameter in (mm) - 3.3 (86)
 Gasoline Engine - Honda GX160
 Rollers - 4
