

XAIR

Compressor Breaker System

Only
298 LBS

Transportable
By One Person

No Towing
Required

Small Investment, Big Return

The light & compact size of X AIR Compressors, along with a retractable handle and pneumatic tires, makes it manually **transportable by one person**. The rotary screw is derived from the very latest compressed air technology. An efficient and high performance rotary screw generating **70 CFM**; powerful enough to run a **90 pound class breaker**. Creating a **single tool package** that is for power and portability, like no other.

"80% of compressors are rented with one breaker!"

It's the perfect solution.

(40 cfm models and 175 psi models available)

Detachable gas tank

Easily lifts into the back of a car
