

# ***Power Pusher***

## **E-750 Electric Wheelbarrow**

The Power Pusher ***E-750 Electric Wheelbarrow*** is designed to safely and easily transport loads weighing up to 1000 pounds. Available in galvanized steel or heavy-duty, high-density poly, the wheelbarrow is designed to improve safety and efficiency by eliminating ergonomic challenges and unnecessary production delays

that are associated with manually operated wheelbarrows. Designed to minimize strain, the E-750 is ergonomic and provides push-button powered dump capability.

# E-750 Wheelbarrow

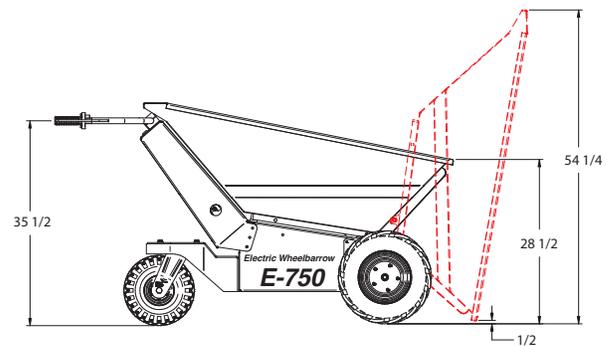

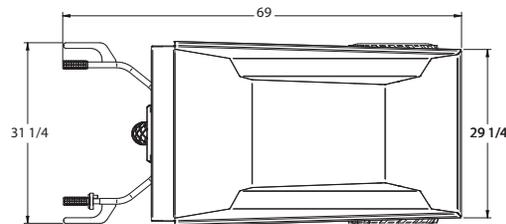

## FEATURES AND BENEFITS

- Available with a heavy-duty, high-density poly tub or a galvanized steel tub to handle diverse material-handling applications
- The motor, powered by a rechargeable 24v battery, can run five-miles on one charge
- Hauling up to 1000 pounds at 4-miles-per-hour increases production speed and efficiency
- Quiet motor with no emissions is suitable for indoor or outdoor use
- Tub capacity up to twelve cubic feet allows the hauling of large loads in one pass
- Powered dump feature allows users to eject materials with the push of a button on the wheelbarrow handle
- Durable, reliable construction is suitable for rocks, bricks, sand and concrete, fertilizer, sod, soil, mulch and many other materials
- Standard foam-filled tires, never go flat
